Executive Summary

- Building AI products using AI while learning AI to make AI better for everyone
- Can pool, pipe, and clean any data sources
- Hacker, maker, and problem solver

Career Accomplishments

BenchSci, Toronto

Oct **2020** – Aug **2024**

Tech Lead

- Boosted Data curation by 300%, cut error rates 20x by building fullstack pubsub data pipes
- Cut down deployment time over 80% by creating better testing strategies and development tools.
- Reduced onboarding workflows by weeks through flexible architecture to create data pipelines for custom integrations.
- Enhanced team productivity by 30% through an LLM chatbot that answered questions and created new code from our codebase

Intersect, Toronto

Jul **2016** – Oct **2020**

Data Engineer - Tech Lead

Sep **2019** - Oct **2020**

- Deployed House pricing regression models, predicting home sale prices from data models with millions of records, computed in seconds.
- Created data engineering practice, training over 15 engineers and data scientists in best practices, leading to over \$5M in new services revenue.

Sr. Software Engineer

Jul **2016** - Oct **2019**

- Microservices... lots of them, with kafka on the side
- Improved test generation x100 - taking it down to seconds, and improving project margin by over 10%
- Built high performing, high volume credit card and exchange system for one of the top 5 banks in Canada, processing over \$15M in money movement daily through the app
- Built multiple backends for different companies including LCBO and Lobogene

Ellefson technology consulting (Now Ollon), Toronto

Nov **2012** – Jun **2016**

Software Developer

- API wrappers for refreshing legacy code
- Built the kiosk version - ~~On display at the Ontario Science Center in 2024~~ No More Science Center :(
- Built internal image labeling tool for MeFinder

Education and Certificates

Google Cloud Professional ML Engineer., 2024

Google Cloud Professional Data Engineer, 2019

BSc CS., 2012, York U
